

## Design requirements

Requirements for the design of oral, poster and video reports: The Forum program will be implemented in the form of reports by well-known scientists, as well as presentations by young researchers.

The oral report is prepared and presented online in the Zoom environment in accordance with the Program. A presentation is prepared for the presentation of the report and sent to the address that will be indicated after the announcement of the acceptance of the thesis. The message time is 10 minutes and questions.

Reports Young participants present reports within the sections of youth video reports, which are presented in the form of a presentation of 6-7 slides with audio accompaniment in English. The picture should be clear and the information should be well readable, and the sound should be clear and loud. The video recording of the report should be made in the format: \*.avi, \*.mkv or \*.mp4 (no more than 300 MB in size). The video must be put to cloud storage (Dropbox, Yandex disk, Google drive, etc.). Video length report no more than 10 minutes

Rules for the preparation of Posters for the poster section. The poster should be filled in A1 format, measuring 594 (length) x 841 (height) mm. The poster presentation should contain the following information in sequential order:

### Report number.

The name of the poster (necessarily coincides with the title of the submitted thesis from the Forum program).

Submission of the author and all co-authors (in the same order as in the submitted article with the mention of organizations of addresses and countries, with the e-mail address of the submitting author).

### Affiliation(s)

The rest of the poster materials (purpose / relevance of the study / materials and methods of research / results, novelty and conclusions - required. All information, including figures, tables - should be legible from a distance of 2-6 meters. At the end of the poster, if space allows, you can put thanks.

The authors should illustrate the results of their research by showing graphs, photographs, diagrams and a small amount of text on the poster.

Video reports (issued in accordance with the rules for video reports) and poster stands (pdf format) should be sent to the conference e-mail [feb-2021@mail.ru](mailto:feb-2021@mail.ru) no later than December 09. The video will be compiled into a video for the corresponding section. Posters will be uploaded during the poster presentation section to present them with a public performance in the zoom session. In section c, you will have 1 -1.5 minutes of time to present your work using your poster. You can use your one poster slide sent to the organizing committee in pdf format to illustrate your presentation. In the chat during the section, you will be able to ask questions and answer them. A personal online presentation of your poster in ZOOM format is mandatory for all participants with poster presentations. The

**participants of the video presentations section are present during the section via ZOOM and after the end of the video presentations, the sections discuss the reports and choose the best one, this is mandatory for participants with video presentations.**
